OBJECTIVE

A highly motivated Computer Science student seeking to get a position in a reputed company where I can use my skills and knowledge to learn new things and grow as a developer. I wish to work in a growth-oriented Company and contribute to the development of the organization while upgrading my skills set and knowledge.

EDUCATION

Undergraduate | UBIT (Department of Computer Science) - University of Karachi

2021 – PRESENT

BS-Computer Science

Intermediate | Government college for Men

2018 – 2020

Matriculation | Metropolitan Academy (Campus-1)

2018

EXPERIENCE

Fresher:

Front-end developer from Karachi University(UBIT). Proficient in HTML, Bootstrap and JavaScript by which I have made layouts of multiple web pages and still doing practice in this field. On the other hand, I start practicing on ReactJs and have pretty much knowledge about Blockchain and still working on it. I'm a Professional, dynamic, and driven to achieve the highest standards.

.The Spark foundation:

Recently completed my first internship from The Spark Foundation as web Developer, one month. In internship made a project 'Bank Management System' Bank Management System' consist of two pages one is main page and other one have user's transaction and their history of transaction. Construct with the help of Html , Css , Bootstrap and Javascript.

SKILLS

HTML

CSS

Pretty much knowledge about Block chain

JAVASCRIPT

REACTJS

BOOTSTRAP

PROJECTS

Basic Website Layout Using HTML, Bootstrap and JavaScript.

In this website I have used a basic HTML, Bootstrap and JavaScript and form a structure of website using different design and properties of CSS to make it responsive.

Text Tutle using ReactJs.

Made text tutle using ReactJs and Bootsstrap with the help of props and stats. This text tutle convert the upper Case into Lower Case and vice versa, count words, time took to read the sentences , capitalize 1st letter , copy and clear options and aslo preview summary also contain Dark mode.

Bank Management System.

Bank Management System' consist of two pages one is main page and other one have user's transaction and their history of transaction. Construct with the help of Html , Css , Bootstrap and Javascript.

Weather App.

Weather App show weather details any of countries and cities. Default it set on Karachi city. for other you can also search and submit and after this some countrie,s weather details are fixed . Weather details extract with help of API(ninja weather API)
